BRICKGUN

LEGO® Storage Labels

Bricks 2 x *N*

v2.1

(Including Round & Modified)

The following is the labeling system used in the BrickGun studio by our model designers.

Whether you're working with part collections that number in the tens or in the hundreds of thousands, having them organized in an easy-to-locate fashion is paramount. You want to spend time building, not scrounging to find the correct part in the correct color.

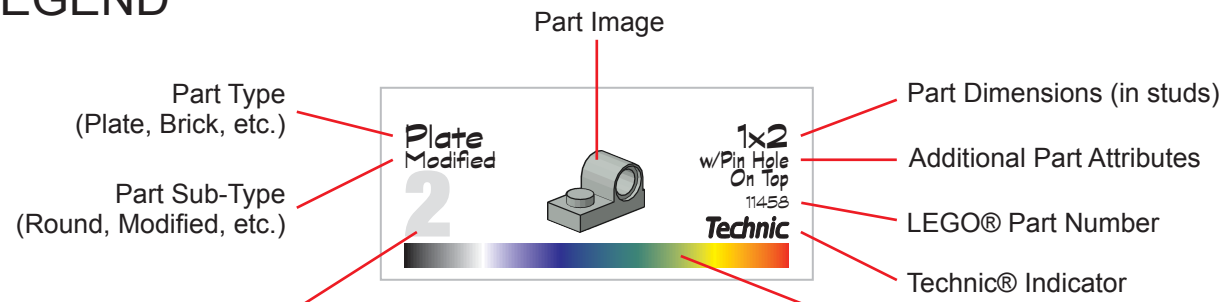
We employ a series of clear drawer organizers, similar to those made by Stack-On™, Akro-Mills™ and others. Our "standard" drawers are 2.75" wide, "narrow" drawers (for smaller parts, mostly Technic™) are 2" wide and other larger drawers are various heights and widths (for large parts and bulk storage).

The racks are organized by part type (Plates, Bricks, Slopes, etc.) with similar parts increasing in dimension from left to right. Parts of the same type are separated by color vertically.

The labels provide all necessary information at a glance, showing what type and sub-type the part is, its image, dimensions and what colors of the part are in the particular drawer. The LEGO® part number is also included, which is helpful when ordering more or working in MLCAD to document a design.

We print our labels on standard Inkjet or Laser Printers, using Avery full-sheet labels (8165). They are cut along the gray guidelines using a metal straight-edge and X-acto™ knife (with a #11 blade). A paper cutter can also be used if you have one at your disposal.

LEGEND



Certain parts will have a large part length indicator on the label as well. This is to help quickly identify the correct drawer when parts of a similar type are situated adjacently.
We group all of our similar parts with length increasing from left to right, so being able to see a large "2" or "4" in the "Plate 2x" area, for example, makes part selection that much faster and easier.

Rainbow gradient denotes all colors are in drawer:

Otherwise, specific color(s) are shown:

Lighter, bordered shades indicate translucent pieces:
